Education

- BSc in Software Engineering**

Cardiff Metropolitan University
(ICBT)

2023 - Jun 2025

Completed an intensive undergraduate program covering full-stack development, object-oriented programming, databases, and software engineering principles. Demonstrated strong academic performance and teamwork through projects and assessments.

- Higher National Diploma in Software Engineering**

National Institute Of Business
Management (NIBM)

2020 - 2022

- A/L**

H/ Beliatta Central College

2016 - 2018

Objective

To contribute to challenging software development projects by leveraging my expertise, collaborating with talented teams, and delivering efficient, scalable solutions that drive value for organizations and users.

Work Experience

Software Engineer, Cody Zea (Pvt) Ltd

November 2024 - Present

As a Software Engineer at CODY ZEA (PVT) LTD, I develop and manage projects, including mobile apps, web applications, desktop software, and cloud solutions. My role involves leading project lifecycles, collaborating with teams to streamline workflows, and delivering scalable, user-focused solutions. ([See more](#))

Associate Software Engineer, American Premium Water Systems (Pvt) Ltd, Colombo 03

August 2023 - May 2024

Designed and developed two web application systems for revenue collection and water quality monitoring using Angular (frontend) and Laravel/.NET (backend). Key features included inventory management, real-time data visualization, and expiry date alerts for proactive management. Implemented PHPUnit test cases to ensure reliability and seamless integration, enhancing operational efficiency and data-driven decision-making. ([See more](#))

Intern Software Engineer, American Premium Water Systems (Pvt) Ltd, Colombo 03

March 2023 - August 2023

Developed robust applications, including Production and Monthly E-Invoice systems, utilizing PHP, C#, MySQL, and MSSQL. Created a Flutter-based mobile app for the E-Invoice system with a PHP backend. Leveraged JIRA for project management and Git/Bitbucket for version control and CI/CD, ensuring seamless workflows and effective team collaboration. ([See more](#))

Freelance Work

2022 - Present

Delivered solutions from static websites to full-stack web apps, POS systems, and hybrid mobile apps using technologies like HTML, CSS, JavaScript, ReactJS, Laravel, and Flutter. Proficient in backend development with MySQL, PHP, and Node.js, as well as UI/UX design with Figma.

Implemented real-time chat applications using WebSockets and deployed machine learning models with Python for data-driven automation. Leveraged GitHub CLI and pipelines for streamlined version control and deployment, ensuring high-quality solutions. ([See more](#))

Technologies

Frameworks & Libraries (React, Angular, Next, Java Swing, Java FX, Spring Boot, DotNet Core, Express.js, Nest, EJS, Laravel)

Mobile Development (React Native, Flutter, Java Native Android Development)

Database & Tools (MSSQL, MySQL, MongoDB, Mongoose, MongoDB Atlas, SSMS, MySQL workbench, Azure Data Studio)

Version Control (Git, GitHub, GitLab, Bitbucket)

Project management (Jira, Confluence)

Projects And My Works

Full stack development Laravel, Angular, Flutter, C#, Javascript & MySQL as database (1 year of Experience in American Water)

- Quality Department System ([live site view](#)) ([github view](#))
- Collections Managing System ([live site view](#)) ([github view](#))
- All Apps - Configured as PWA ([live site view](#))
- Flutter Mobile App Invoice System ([github view](#))
- Monthly Invoice sms Links Generate System ([github view](#))

CODY ZEA (PVT) LTD Main App (Cross-Platform Mobile App)

- Developed for **Codyzea Software Company**, the app provides seamless access to services on **Android**. [GitHub Repository](#)

Garbage Cleaning System (IoT-based Mobile App)

- Created an IoT-based platform for efficient garbage collection using **Flutter** for the mobile app and **PHP** for the backend. [GitHub Repository](#)

Multi-Environment POS System (POS Mobile & Windows App)

- Developed a versatile **POS system** for mobile and Windows platforms using **Flutter** and **SQLite**. [GitHub Repository](#)

LoveBirds Dating App (Flutter Mobile App)

- A dating app developed using **Flutter** and **Dart** for a smooth and interactive user experience. [GitHub Repository](#)

Flutter Soil-Compatible Crop Selection App (Machine Learning for Soil and Crop Matching)

- Developed a **Flutter** mobile app that uses **machine learning algorithms** to match soil types with suitable crops. [GitHub Repository](#)

Jaffna Marriage. (Dating Website)

- Developed the **frontend** for the **Jaffna Marriage** website, deployed using **cPanel** and connected via **FTP**. The **backend** is built with **Laravel**, ensuring smooth data handling and user management. [GitHub Repository](#)

Dog Skin Disease Diagnosis and Pharmacy (Python Web App)

- This web application uses a machine learning model to diagnose skin diseases in dogs based on uploaded images. The app recommends corresponding medications and allows users to order the medicine online. [GitHub Repository](#)
